

CRA I (Blanchard & Asociados SRL)

Searching for CRA based in Buenos Aires, Argentina with more than 1 year of monitoring experience.

### **Job description**

The Clinical Research Associate (CRA) performs and coordinates all aspects of the clinical monitoring and site management process in accordance with ICH Good Clinical Practices, FDA guidelines, local regulations and LATINABA Standard Operating Procedures.

Conducts site visits to assess protocol and regulatory compliance and manages required documentation. Responsible for ensuring that data will pass international quality assurance audits. Represents LATINABA in the global medical research community and develops and maintains collaborative relationships with investigational sites and client company personnel.

Will assist project manager or clinical team manager on assigned projects and will collaborate with other CRAs May be required to travel 20-30% of time on average.

### **Education And Experience**

Bachelor's degree in a science related field or a Registered Nursing certification or equivalent certification/licensure from an appropriately accredited institution

Preferred to have minimal clinical monitoring experience of **1 year** that provides the required knowledge, skills, and abilities. In some cases previous experience (comparable to 2 years) in a clinical environment where experience is gained in clinical trials, medical terminology, medical research, clinical research or health care OR experience in a health sciences field with formal training in medical terminology and anatomy may be considered as a plus.

In some cases an equivalent combination of education, professional training, and experience that provides the required Knowledge, Skills and Abilities may be considered

### **Knowledge, Skills And Abilities**

- Basic medical/therapeutic area knowledge and understanding of medical terminology
- Ability to attain and maintain a working knowledge of Good Clinical Practices and applicable Standard Operating Procedures
- Excellent oral and written communication skills in English, with the ability to communicate effectively with medical personnel. Good English language and grammar skills
- Customer focus
- Good interpersonal skills
- Good organizational and time management skills
- Attention to detail
- Flexibility and adaptability
- Ability to work in a team or independently as required
- Good computer skills: good knowledge of Microsoft Office and the ability to learn appropriate software
